

Amendments to the Specification

Amend the paragraph commencing at page 9, line 2, to read as follows:

The retainer clips 55 advantageously are formed of a flat, spring steel material of, for example, 0.015 in thickness, and are formed with a generally flat central panel portion 58 provided with openings ~~59~~ **58a** for the rivets 56, 57, and provided on opposite sides with spring panels 59, 60 which extend at an angle to the plane of the central portion 58. In the illustrated form of the device, in which the diameter of the cartridge ring 40 may be on the order of five inches, the side panels 59, 60 suitably are disposed at an angle of about 25 degrees relative to the plane of the central panel portion 58.
